Abstract:

In this scientific research, it is focused that every human has an inbuilt local Tri-pole Antenna and deriving electromagnetic energy for function of Human Heart. Every human shall be considered as a roam free cell phone.

Nature provides Roam free service to every human. The nature expects this roam free service to be utilized for effective joyful life and building up social and environmental good Health.

In Prehistoric time the SWR (Standing Wave Ratio) was considered as very low as human Antenna was exactly turned to "Master Antenna". Whereas in Modern time the human antenna position is considered as highly deviated and mismatched with Master Antenna. It is speculated that because of the high SWR value the immunity system is gradually lost and suffers from Environmental Health. Exposure to cell phone radiation affects the health?! In prehistoric time human exposed to even more severe cosmic radiation, but lived for long span of life. In this research it is focused that the accumulation of standing waves in the atmosphere shall be considered as producing more harmonics which ultimately interacts with human system and there by the immunity system is lost and various new diseases and disorders such as heart beat rise, blood sugar level disorder, urinary infection, cancer cell growth due to DNA disorder, fast hair loss, other skin diseases etc. In short it shall be stipulated that human health is much affected due to high intensity of harmonics level of the HUMAN RADIATION generated rather than exposed to radiation of cell phone tower.

This research focus that effective tuning of every human antenna with master antenna shall pave way for reduction of harmonics and there by human cells as well as environmental health shall be improved.

It is speculated that the high SWR affects greatly the symmetry of Neutrinos relative position which results in frequent occurrence of earth quake, volcanic activity, fast cancer growth, sudden forest fire etc.

It is the need of the hour that every person shall take individual effort to reduce their SWR for overall contribution to global Health.

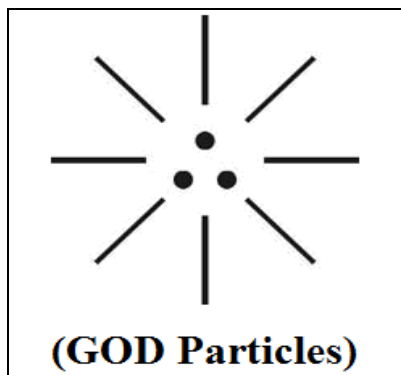

Figure 5

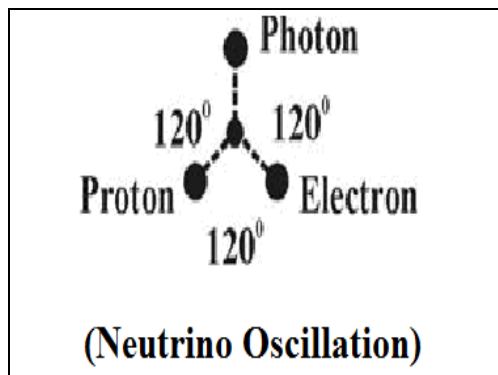

Figure 6

The Godly particles shall be considered as responsible for evolution of various atoms, mother, molecules, planets, including “Origin of Life”. In the evolution of early Universe four planets MARS, SUN, EARTH, MOON shall be considered as Natural Planets existing before origin of Life. All other planets shall be considered as Species planets. Further MARS shall be considered as Mother of all planets and the Material Universe shall be considered as “MARS Centered Universe”.

10.3.MARS Planet Is Natural Electromagnetic Antenna?!...

It is hypothesized as MARS shall be considered as “ENERGY CENTRE” of Material Universe. MARS shall be considered as “Electrical Transducer” which transforms Neutrino radiation into Electromagnetic radiation. In other words MARS shall be considered as Huge Antenna which produces and radiates energy as “Billions of Billions” Electromagnetic rays. Each ray shall be considered having varied energy level distinguished with different wave length and frequency.

“MARS planet shall be considered as “Natural Multi Axis Antenna” transmitting Electromagnetic waves with three distinguished “Bandwidth” region (i.e) UV, Visible, IR region. The Philosophy of MARR Tower might be derived from philosophy of MARS Antenna”.

10.4.Philosophy Of EMR?!...

Current Electromagnetic theory focus that Electromagnetic wave is composed of Electric and Magnetic field component Characterized by SINE WAVE. Further the Electromagnetic wave is considered travels at the speed of 2.99×10^8 m/s having Electric and Magnetic field perpendicular to each other.

It is hypothesized that EMR (Electro Magnetic Radiation) shall be considered distinct from so called Electromagnetic Wave. The EMR shall be defined within the following scope.

- EMR shall be considered contain three fundamental particles Photon, Electron, Proton having similar charge equivalent to fundamental Neutrinos but slightly having “little higher mass” compared to Neutrinos.
- EMR shall be considered containing three dimensional component (i.e) Optic, Electric, Magnetic field and existing perpendicular to each other in three dimensional shape.

Every Human Antenna shall be considered as local BTS accessed through Specific SIM CARD and connected to “MASTER MARS ANTENNA”. MARS Antenna shall be considered as Energy Centre deriving energy from GOD Particles. It is hypothesized that the standard heart beat of human is closely associated with natural frequency of Earth and the region where the human lives. The standard heart beat of prehistoric human when lived in

MARS planet might be 60 pulses per minute. During the course of time the standard heart beat might be gradually shifted from 60 to present day 80 pulses per minute due to progressive ASYMMETRY in the base of Universe. It is hypothesized that the standard Heart Beat of every human shall be considered as equivalent to tuned frequency of Individual and the wave length of each person shall be ascertained from the following formula.

$$\lambda = k \times \frac{v}{f} \text{ meter.}$$

k – resultant constant of Reflectivity Permittivity, Permeability

v – 3×10^8 m/s

10.7. New Philosophy Of EMR Antenna?

In conventional definition Antenna is considered as a Electric Transducer for converting Electromagnetic wave energy into Oscillating Current and vice Versa. Antennas are of different types according to specific purpose of handling the respective nature of Electromagnetic wave and region such as RF Antenna, UHF Antenna, Microwave Antenna, Radar antenna etc.

It is hypothesized that the meaning of word “Antenna” shall not be considered as mere transducer but shall be considered having elaborate meaning. Antenna shall be defined with in the following scope.

Further it is hypothesized that the frequency of electric pulse is closely associated with frequency of natural oscillation of neutrino particles. The Three sensory of Human Antenna shall be described as below.

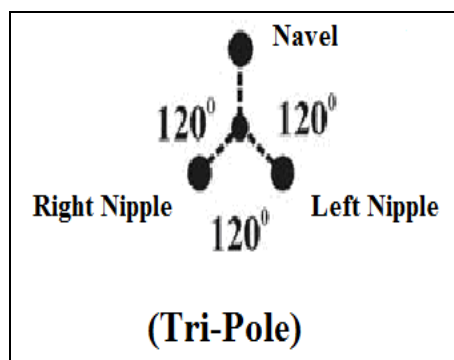

Figure 9

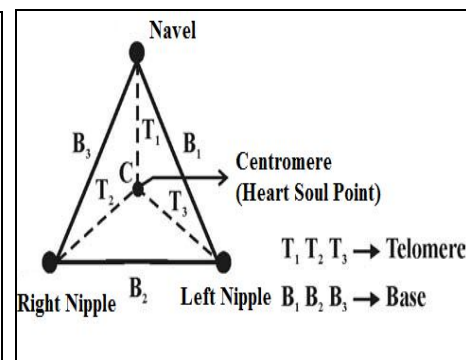

Figure 10

- Right Nipple – Magnetic (Functional)
- Left Nipple – Electric (Structural)
- Navel – Optic (Sequential)

Human Antenna shall be considered as Mobile TRIPOLE like structure tuned to MARS Master Antenna. The philosophy of MARR (Multi Axis Radio Range) might be derived from the philosophy of Tri-Pole MARS Master antenna. In fact MARR shall be newly translated as Mu axis radio range. MU shall mean THREE which is related to three domain of optic, electric, magnetic of electromagnetic radiation.

Case study on Heart Anatomy and Heart function

Case study shows that each heart beat is triggered by an NATURAL ELECTRICAL PACE MAKER i.e. a group of cells in the heart that have the ability to generate electrical activity. They cause electrical impulses to spread over the heart and make it contract.

The natural pace maker shall also be called as ELECTRICAL HEART. Each heart beat is started electrically at SN (Sinoatrial Node). Then the electrical pulse is carried to AVN (Atrio Ventricular Node) and relayed to ventricles and right bundle branches to the heart muscles for making natural rhythm of heart.

Case study show that the SN is found located in the to of right ATRIUM. From atrium specialized group of cells that carry the electrical charge lead off to the rest of the heart.

It is hypothesized that the energy point of the heart shall not be beginning at atrium and it shall be slightly located outside the heart and probably connected through nerves leading to the centromere of TRIPOLE ANTENNA. In brief it shall be stipulated that the centromere of Tripole antenna shall be connected to the point of atrium to route NERVE. The philosophy lies that if the energy point is derived from atrium then while replacing natural pace maker with artificial pace maker the centromere of energy point connected to Universe energy source shall be lost. Where as if the centromere is located outside the atrium then replacement of artificial pacemaker shall continue to have connectivity to the centromere and there by the connectivity to the tripole antenna shall not be lost.

Case study shows that after transplant of original heart with pacemaker and artificial heart some times HRV (Heart Rate Variation) influenced by dislocation of natural connectivity with tripole antenna.

Further it is hypothesized that the heart pulse being regulated by THREE NODE rather than two node as stipulated in case study (SN, AVN). The three node shall be considered as the tripole antenna consists of right nipple, left nipple, navel connected star point which is called as centromere. From centromere the tiny electrical pulses shall be considered as fed to the atrium through nerves.
