Atomic Genetics and Origin of the Universe: Volume-6

V. M. Das

University Of God, Das Nursing Home, Parade Ground, Fatehgarh, India

Abstract:

Mind, the inner most box of nature has not been investigated by modern physicists. Mind has not been incorporated in Standard model. Mind can only be studied by participatory science. Having searched Basic building blocks of the universe i.e. mass part of reality (figure 1.1) [9], we have also investigated mind part of reality [8] and finally two fundamental particles with mind and mass realities are hypothesized (figure 1.2). Now we discuss how to further investigate mind so as to know their structures and functions. Atomic genetics is the branch of science where we investigate about fundamental interactions of the universe i.e. atomic transcription and translations. New words have been coined to understand hidden science of mind part of reality. Mind reality have been recognized as different faces by "I" about 5000 years back to Arjuna in Mahabharata. It is just like to understand any language through Alphabets. These are (different faces) Alphabets of mind reality. One Mind reality has one face identity and the second mind reality has second face identity and so on. The facial expression represents phenomenon of intelligence and different face represents different types of properties carrying property. The open eyes means property is activated while close eye means property is inactivated. In spite of carrying properties consciousness they also know how to conduct not only origin of universe but also how to create two different universe i.e. next creation could be different from this creation. In all, It is automatic system of the universe. The mind realities which are of good properties have devtas face identity (first five faces on both side) and those mind realities which are of bad properties have demons face identity (last four faces on both side). These are named as code PCPs or messenger atomic genes. The central face is CCP or Thought script where all thoughts of the universe are banked. It is bank of data of all information s of the universe. It is face identity of Anti mind particles as data of all information's of the universe are stored as anti mind particles. It is the Time mind ness (biological clock) that keeps on expressing different thoughts from this thought script (CCP). There are four more faces (black bodies) shown on extreme left and right floating in fire are CPs (translating Atomic genes). That translates the messages and realizes it and reacts accordingly. Rest pictures are creation of different individuals and nature (sun, moon and snake and other pictures made on hands and body) by different thoughts of Almighty B.B.B. The entire picture has been explained in Geeta in 11/10 and 11 (figure 1.3). Whatever is being created in this universe is basically not by our thoughts rather it is the thought of Almighty B.B.B (Yang B.B.B or matter B.B.B. or Male B.B.B working as Highest center of the universe.) that is dominated over creation and destruction of this cycle of the universe. (figure 1)

Keywords: *mind and mass reality, Data Bank of all information s of the universe –CCP, messenger atomic genes(Code PCPs), translating atomic genes (CP), Almighty B.B.B (Yang B.B.B or matter B.B.B. or Male B.B.B working as Highest center of the universe).*

1. Introduction

It is the atomic genes which constitutes mind part of reality. Mind incorporation in physics is awaited as theory of everything is not yet investigated. I have investigated theory of everything (ToE) and I found that while studying unified theory at the time of origin of the universe by Hoyle Narlikar universe, it was mind reality that triggered symmetry breaking phase. It is mind reality that triggers oscillation phenomenon of the universe. It is the mind reality which is behind perfect cosmological principle. There is nothing like artificial intelligence in the universe. These mind particles constitute intelligence of the universe that controls the deterministic order of the universe. It is the mind reality behind all effects of the universe. But this is not our mind rather it is mind of Almighty B.B.B (Yang B.B.B or matter B.B.B. or Male B.B.B working as Highest center of the universe). His mind could be manipulated by prayer only.(figure 1and 1.1) ---[7]

2. Structure

2.1. Clues regarding mind part of reality.[1]

Figure 1.3: God form of "I" It is by virtue of Almighty power and by unconditioned working of B.B.Bs. Almighty B.B.B has power to make any physical law that we do not have.

Avatar of "I" gave the first teaching of Mind to Arjun in Mahabharata.----[1] Avatar of "I" showed this teaching by His God Form. This portrait gives many messages about deep mysteries of the universe that we shall discuss time to time. The clue picture is God form of "I" as shown in GEETA. It is the clue as regard to the mind part of reality (figure 1.3). It does mean that mind or conscious particles or atomic genes are found in the nature. In standard model mind has not been incorporated.

Revealing innumerable wonders, innumerable mouths and eyes, decorated with innumerable dazzling ornaments, armed with innumerable gleaming weapons, magnificently attired and resplendently garlanded, anointed with exquisite, celestial fragrance, completely amazing and phenomenal, unlimited, brilliant and all pervading. (Translation----11/10-11-----[1])

Figure 1.5

2.4. Father of Cell Genetics

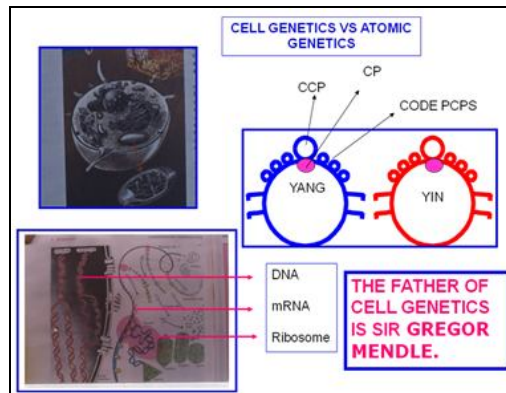

Figure 2: To understand atomic genetics , one should know cell genetics—[4]

2.5. Messages from Biological world to understand B.B.B world

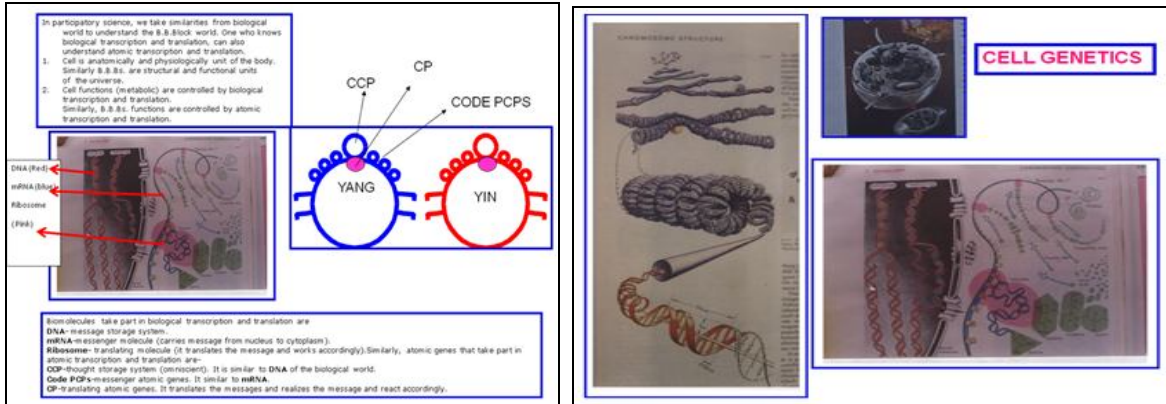

Figure 3: Biological transcription and translation

Figure 4: DNA Script (left) and biological transcription and translation (right) both are found in Human cell (above)

To understand cell genetics, we should know structure and function of genes . Chromosomes carry information in form of DNA. It is a script. During transcription mRNA forms as it prints messages from DNA and carry messages from nucleus to cytoplasm where ribosome translates the messages and it work accordingly i.e. formation of polypeptides (PROTEIN SYNTHESIS) take place . Polypeptides are enzymes and hormones carrying programmed messages (Code PCPs) to carryout fixed programmed work as destined in DNA (figure 4) . DNA is made up of four nucleotides called A,T,C,G (adenine , thymine, cytosine and guanine) . mRNAs are made up of four nucleotides called A,U,C,G(adenine , uracil , cytosine and Guanine) . They form code or codon (triplet code , one triplet code represent one amino acid) of mRNAs . mRNAs carry information in form of triplet codons from DNA anti triplet code or codons . The DNA counterpart is made up of four nucleotide i.e. A-T, C-G (T for thymine) . During transcription, A of DNA combines with U of mRNA, C of DNA combines with G of mRNA . T of DNA combines with A of mRNA, G of DNA combines with C of mRNA. (A-U, C-G, T-A, G-C) (Figure 4.1) . If mRNA is made up of codon script then DNA is made up of anti codon script . If messenger atomic genes are mind Code PCPs then the CCP (equivalent to DNA) is made up of Anti mind particles (most mysterious structure of universe or thought script-CCP) .

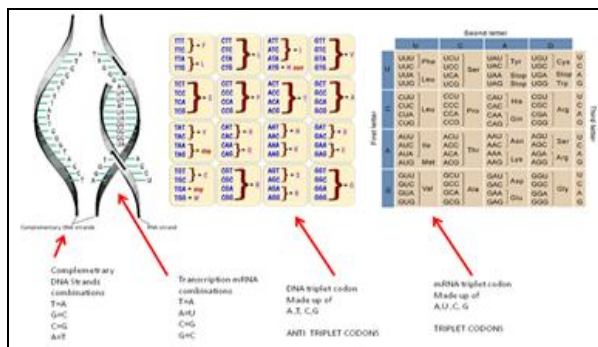

Figure 4.1: DNA is made up of Anti triplet codons while mRNA is made up of triplet codons)

During transcription, A of DNA combines with U of mRNA, C of DNA combines with G of mRNA . T of DNA combines with A of mRNA, G of DNA combines with C of mRNA. (A-U, C-G, T-A, G-C). If mRNA is made up of codon script or triplet codon then DNA is made up of anti codon script or antitriplet codon . If messenger atomic genes are mind Code PCPs then the thought script (equivalent to DNA) is made up of Anti mind CCP (most mysterious structure of universe or thought script-CCP) . If the face identity of mind Code PCPs is male the then the face identity of anti mind CCP is female . (Not shown in Figure 1.2)

Figure 5: Induction of protein synthesis
 Figure 6: Repression of Protein synthesis

INDUCTION OF PROTEIN SYNTHESIS (figure 5) - Structure of DNA - There are three genes involved in protein synthesis one is regulator gene which works through repressor protein , operon which is made up of structural genes and operator gene. During induction regulator gene which forms repressor protein (red cap) is removed from operator gene by hormones , metabolites or embryonic organizers etc . Thus operator genes get activated. It activates structural genes (DNA script) to form mRNAs (blue threads) . mRNAs form polypeptides chains and finally hormones and enzymes (black threads) . (ribosome has not been shown)---- [5]

REPRESSION OF PROTEIN SYNTHESIS (figure 6)- During repression , the hormones , metabolites or embryonic organizers etc along with repressor protein (red cap) which is formed by regulator gene , come in contact with operator gene to stop its activation to structural gene, With the result structural genes stop forming mRNAs and finally formation of polypeptide chain formation gets stopped. -[6]

Figure 7: Induction of protein synthesis

INDUCTION OF PROTEIN SYNTHESIS (figure 7) - Structure of DNA - There are three genes involved in protein synthesis one is regulator gene (green) which works through repressor protein . Operon which is made up of structural genes (magenta) and operator gene (orange) . During induction, repressor protein (green) is removed from operator gene by metabolites (lactulose) . Thus operator genes get activated. It activates structural genes (DNA script) to form mRNAs (magenta threads) from inactivated nucleotides (adenine , guanine, uracil and cytosin) . mRNAs are being formed from exon and intron structural genes . After this there is phenomenon of splicing where meaning full mRNAs (messages) are formed and after that there is translation by ribosome (brown) and there is formation of polypeptides chains and finally hormones and enzymes are formed . -[5]

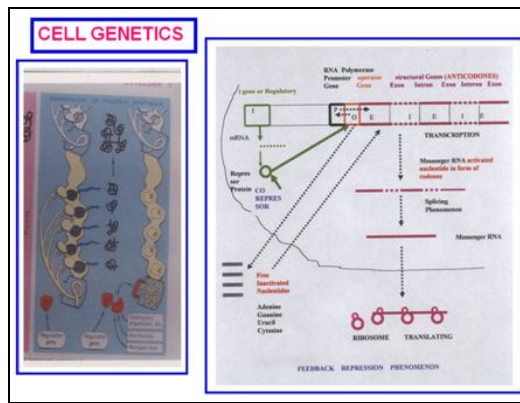

Figure 8: Repression of protein synthesis

REPRESSION OF PROTEIN SYNTHESIS (figure 8) – During repression , co-repressor along with regulator gene which work through repressor protein (green), come in contact with operator gene (orange) to stop its activation to structural gene(magenta) , There is no activation of nucleotides (adenine , guanine , uracil and cytosin) by operator gene . With the result structural genes stops forming mRNAs (magenta) and finally formation of polypeptide chain formation gets stopped. ---[6]

2.6. Atomic Transcription and Translation

Figure 10: PRAYER MESSAGE FORMATION IN BRAIN OF “ O GOD HELP ME ” AT THE LEVEL OF B.B.B. IN FRONTAL LOBE

In atomic transcription and translation , following steps take place . In place of biomolecules we have different mindness (Figure 10)

- CP removes RM (repressor mindness-green) from OM (operating mindness -orange) thus induction of atomic transcription triggers.
- OM triggers activation of free mind particles (black -inactivated code PCPs) of that thought script (magenta) of “o god help me ”
- Free mind particles (black -inactivated code PCPs) get attached to anti mind particles script (magenta one) to form messenger thought script of “o god help me ”.
- Messenger atomic genes (black) get activated by anti mind particles thought script and further they get detached from anti mind particles thought script to form activated messenger atomic genes (activated code PCPs) (magenta) of “ o god help me ”
- CP carries phenomenon of splicing by translating the messenger activated atomic genes (activated code PCPs) and finally there is activated message of “ o god help me” is formed .
- CP represses atomic transcription by adding RM (green) to OM (orange) . Thus atomic transcription gets halt.

Figure 11: Prayer message formation in Brain detail mechanism

In atomic genetic engineering (Figure 11) we use our basic power i.e. power of B.B.Bs. Our B.B.B. (higher center) talks with highest center of the universe by sending the message by first transcription. Till today nobody knows how the brain generates thoughts. I am going to tell you that mystery too. In the frontal lobe the neurons are responsible for thought generation. In the neuron there is electrical activity called pacemaker activity which is occurring between dendrites and the body of the neuron. The membrane of the cell is made up of atoms and atom is made up of B.B.Bs. At the level of B.B.B. say thought of 'O GOD HELP ME' is expressed. As a result programmed messages of O GOD HELP ME (code PCPs) are formed. Out of three programmed messages, one is carried by atomic genes to highest center of the universe. It is called THOUGHT RAY which is made up of pure atomic genes and then the message goes through phenomenon called first transcription. They come out from brain directly. The other two messages are carried by photons from nucleus of atom to electrons. Here they are modulated on electrical activity of the cell called pacemaker activity. Further they are modulated on actions potentials going towards REALIZING CENTER situated in brain stem (RAS) and from RAS to speech area situated in the frontal area. Target B.B.Bs. of the realizing center finally realizes thought effect of O GOD HELP ME. While from speech area message goes to motor cortex again via RAS and from there to vocal cords and finally it comes out as a speech effect of O GOD HELP ME. In layman's terminology formation of the thought ray means PRAYER.

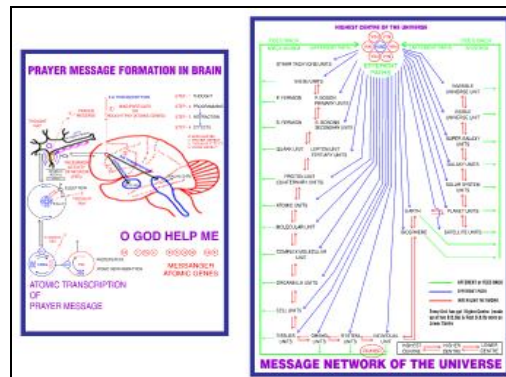

Figure 12: Message net work of the universe for prayer feed back

Prayer message goes (Figure 12) to highest center of the universe via first transcription where it is realized and it is accepted, the highest center sends two messages to B.B.Bs working as higher center in cancer cell. These messages are message of inhibition of abnormal thought expression and message of activation of normal thought expression. Having received the messages, higher center

stops expressing the abnormal thoughts and it starts expressing the normal thoughts. As a result, there are no more abnormal programmed messages and in place of that normal programmed messages are there. Now the messages have shifted from abnormal (5 and 6) to normal (2 and 3). This shifting of thought expression is called ATOMIC GENETIC ENGINEERING (figure 13)
 The changed messages reach to target B.B.Bs. through same route. Having received the changed messages, target B.B.Bs. stop expressing the previous programming and they start expressing the normal programming. As a result the cancer cells transmutate into normal cells. Or diseased cell gets cured.

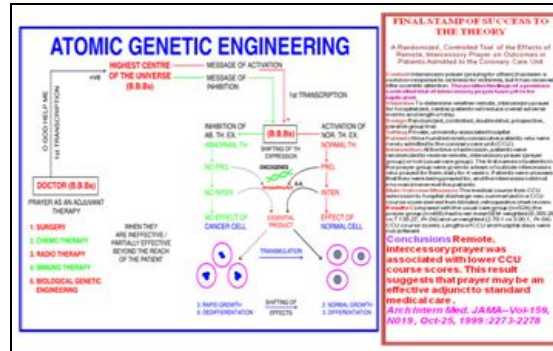

Figure 13: Atomic Genetic Engineering

The message goes to highest center of the universe where it is realized and it is accepted, the highest center sends two messages to B.B.Bs working as higher center in cancer cell. These messages are message of inhibition of abnormal thought expression and message of activation of normal thought expression. Having received the messages, higher center stops expressing the abnormal thoughts and it starts expressing the normal thoughts. As a result, there are no more abnormal programmed messages and in place of that normal programmed messages are there. Now the messages have shifted from abnormal (5 and 6) to normal (2 and 3). This shifting of thought expression is called ATOMIC GENETIC ENGINEERING (left side).

The changed messages reach to target B.B.Bs. through same route. Having received the changed messages, target B.B.Bs. stop expressing the previous programming and they start expressing the normal programming. As a result the cancer cells transmutate into normal cells. Or diseased cell gets cured (right side text). [7]

2.7. Face Identity of mind particles

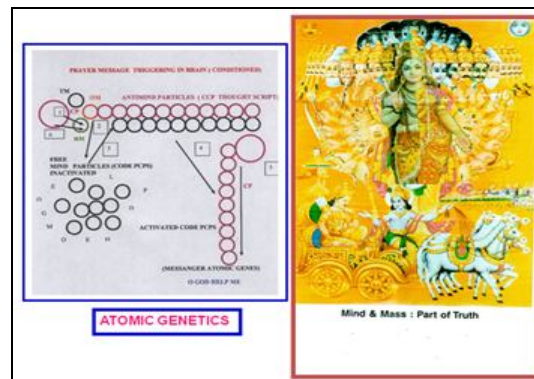

Figure 14: structure and function of atomic genes symbolized. Different atomic genes have been symbolized as different heads

ATOMIC GENES---- The conscious particles (Figure 14) by virtue of which matter and energy attain transmutation phenomenon, properties , laws , interactions, message systems , behavior, life phenomenon, thought phenomenon, creation phenomenon is called atomic genes . They are the mind particles which conduct deterministic order of the universe.

PARTICIPATORY SCIENCE----- To study the nature by a new discipline in which realization and Common sense is the main tools other than observations. For example - as we realize that we work through phenomenon of thought similarly nature works through phenomenon of thought. As we realize that our walking is triggered by our mind similarly electron moves through triggering of its mind. As we interact through thought message system similarly forces interact through thought message system. Our behavior changes with change of thought similarly properties of the matter and energy change with change of their thoughts. We do research by principle of analogy or parallel. It is a new way to know unknown by the help of known knowledge. The known knowledge is either biological knowledge or mystical knowledge.

To understand consciousness and its working we have to understand this picture of God particle. Consciousness has been shown by different heads, It means each conscious particle has definitive shape and properties by virtue of which it has power to activate and inactivate that property that we study in different branches of science or we realize too. For example “ o god help me ” . It is an

activated consciousness or atomic genes formed in brain carried by sound photons to our ears . As soon as we realize this sound effect of “ O God Help Me ” , it gets inactivated inside our brain (in RAS).

It is just like to understand any language through Alphabets. These are (different faces) Alphabets of mind reality. One Mind reality has one face identity and the second mind reality has second face identity and so on. The facial expression represents phenomenon of intelligence and different face represents different types of properties carrying property. The open eyes means property is activated while close eye means property is inactivated. In spite of carrying properties consciousness they also know how to conduct not only origin of universe but also how to create two different universe i.e. next creation could be different from this creation. In all, It is automatic system of the universe . The mind realities which are of good properties have devtas face identity (first five faces on both side) and those mind reality which are of bad properties have demons face identity (last four faces on both side) . These are named as code PCPs or messenger atomic genes . The central face is CCP or Thought script where all thoughts of the universe are banked . It is bank of data of all information s of the universe It is face identity of Anti mind particles as data of all information’s of the universe are stored as anti mind particles . It is the Time mind ness (biological clock) that keeps on expressing different thoughts from this thought script (CCP) . There are four more faces (black bodies) shown on extreme left and right floating in fire are CPs (translating Atomic genes) . That translates the messages and realizes it and reacts accordingly . Rest pictures are creation of different individuals and nature (sun , moon and snake and other pictures made on hands and body) by different thoughts of Almighty B.B.B. The entire picture has been explained in Geeta in 11/ 10 and 11 [1] .Whatever is being created in this universe is basically not by our thoughts rather it is the thought of Almighty B.B.B (Yang B.B.B or matter B.B.B. or Male B.B.B working as Highest center of the universe.) that is dominated over creation and destruction of this cycle of the universe. (Figure 1)

2.8. Intelligence property of CCP (Thought script)

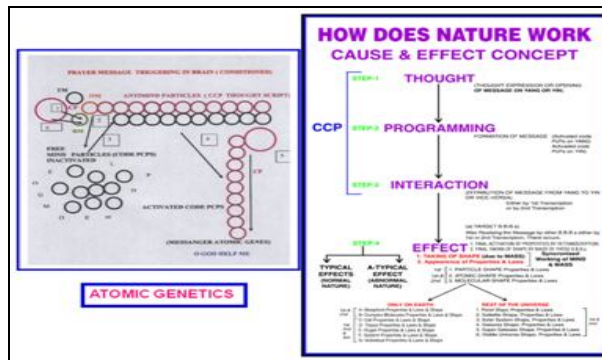

Figure 15: How does nature work ?

When universe got created, different effects were also created . The cause of effect (Figure 15) was thought expression. Unless the thought is expressed, effect cannot come . Effect means taking of different shapes and appearance , different properties and laws. Each type of effect is triggered by a separate thought expression. Different thoughts are expressed as thought of o god help me is expressed. We study different effects in different branches of science. We observe only effects i.e. last step. The first three steps are not possible to see because they occur on B.B.Bs. Hence not visible. These three steps collectively are called CCP. If CCP is written in the equation or in line diagram, it means unless thought expression , programming , and interaction take place , effect cannot come or transmutation could not occur.

How does nature work & triggering of normal & abnormal life effects -To understand the triggering event of the normal and abnormal life effects, one must know about properties of B.B.Bs. At the time of the origin of the universe, all effects got created. The cause of all effects of the universe is THOUGHT expression. It is the first step and it is followed by PROGRAMMING or formation of programmed messages by code PCPs. This programmed message moves from higher centers to target B.B.Bs. it is called INTERACTION. Having received the messages, the mind and mass of the target B.B.Bs. work in a synchronized way so as to produced the effects as thought by a the higher center. If the thought expression by higher center is normal, the shapes, properties and laws produced by target B.B.Bs. would be normal and if the thought expressions are abnormal, the shapes, properties and laws would be abnormal. This is the basic concept of transmutation phenomenon. Finally what we observe is called EFFECT. Appearance of new shapes. properties and laws is called TRANSMUTATION. The first steps are collectively called CCP. During transmutation process if CCP is written, it does mean that unless the thought, programming and interaction take place, nature cannot transmutate. Transmutation phenomenon is seen in particles, atoms, molecules and even in cells. The basic steps of any transmutation remain the same except that the thought expressions differ.

2.9. Messenger Atomic Genes (Code PCPs)

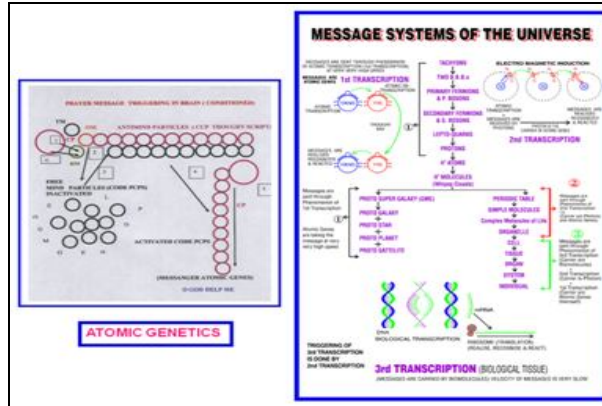

Figure 16: Message system of the universe

Message system of the Universe (Figure 16)

Before the origin of the universe nature had only one type of message systems which is called FIRST TRANSCRIPTION. Messages used to go from one B.B.B. to another B.B.B. by atomic transcription. Messages were carried by atomic genes (activated code PCPs) with very very high velocity. It is the fundamental message system.

After the origin of the universe, nature created atoms. It also created one more message system called SECOND TRANSCRIPTION. Here the message (code PCPs) are carried by photons from one atom to another atom with velocity of light. Thus atoms , molecules, cells, and even individuals talk with one another

After the formation of the cell , nature created one more system called THIRD TRANSCRIPTION .Here there is a message storage system formed by DNA. There are messenger molecules called mRNA that carry message from DNA script to cytoplasm where the message (code PCPs) is read or translated by ribosome and they work accordingly. Thus the messages reach to enzymes and hormones and finally messages reach to target units. Having received the messages, target units work accordingly. Finally life effects (metabolic) are observed. These three types of message systems are working in the nature. These message system are being used by the nature according to nature's need.

2.10. Stimulation of CCP atomic gene

Figure 17: Stimulation of thought Expression

STIMULATION OF THOUGHT EXPRESSION --- thought expressions could be triggered either by from outer stimuli i.e. CONDITIONED STIMULATION of thought expression (Figure 17) , which is caused by medicine , photons or prayer or it is self stimulation i.e. UNCONDITIONED STIMULATION of thought expression .

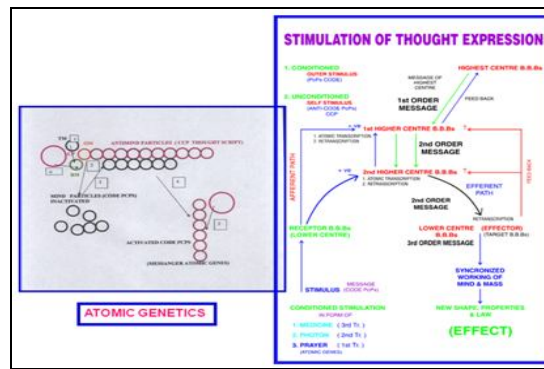

Figure 18: Stimulation of thought Expression

STIMULATION OF THOUGHT EXPRESSION --- Thought expressions by self stimulation is called UNCONDITIONED STIMULATION (Figure 18) of thought expression. Here the TM (time mindness) triggers the thought expression and it activates RM. Further same steps occur. TM is also called biological clock. Origin of universe and creation physics is all due to unconditioned stimulation of thought expression . These are all fed thoughts and feeding was done by Highest center of the universe during pre creation era.

2.11. Feedback mechanism and control of universe by Almighty B.B.B

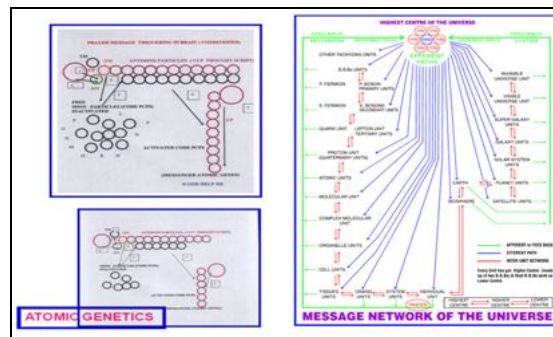

Figure 19: Message net work of the universe

Message network of the Universe (Feed Back Mechanism and different centers of the Universe) (Figure 19)

With the origin of universe, nature first created primary units i.e. primary fermions (gravitation) and primary boson, these primary units are equipped with one higher center (one B.B.B.) and rest of the B.B.Bs. are working as lower centers or target B.B.Bs. After primary units ,nature created secondary units i.e. secondary fermions and secondary bosons. similarly nature created tertiary units (lepto-quarks) and then quaternary units (protons& neutrons).

Each unit is equipped with higher centers, lower centers and target B.B.Bs. After quaternary units nature created atomic units, molecular units, complex molecules of life units, organelle units, cell units, tissue units, organ units, system units and individual units. Each unit is equipped with higher centers, lower centers, and target B.B.Bs. Similarly nature created satellite units, planet units, solar system units, galaxy units, super galaxy units, dark matter layer unit. These units are also equipped with higher centers, lower centers and target B.B.Bs. Thus our universe is divided into different units and each unit is equipped with higher and lower centers. All higher centers are under control of highest center of the universe by efferent paths. This efferent path is made up of first transcription. Higher centers can send messages to highest center of the universe by afferent path or feedback path. Thus highest center of the universe is well informed about all effects of the universe. Messages can come from lower centers to higher centers and from higher centers to highest center of the universe via afferent path. The highest center of the universe can send messages to higher centers and from higher center to lower centers. There is an inter unit message network also which is made up of first, second and third transcription depending upon the nature's need. Thus the entire universe is under control of highest center of the universe. Highest center can change any programming programmed by it during pre creation era.

2.12. Triggering of Creation by Mind

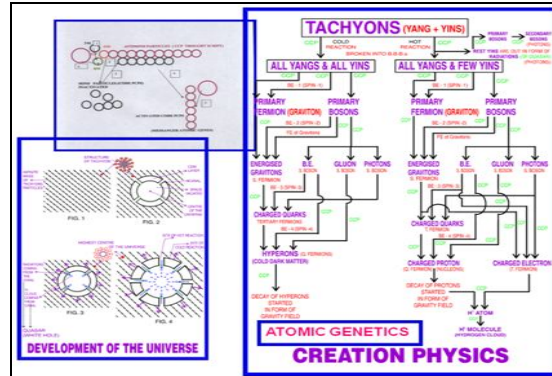

Figure 20: Stimulation of thought expression by unconditioned

STIMULATION OF THOUGHT EXPRESSION (Figure 20) --- Thought expressions by self stimulation is called UNCONDITIONED STIMULATION of thought expression. Here the TM (time mindness) triggers the thought expression and it activates RM. Further same steps occur. TM is also called biological clock. Origin of universe and creation physics is all due to unconditioned stimulation of thought expression . These are all fed thoughts and feeding was done by Highest center of the universe during pre creation era.

2.13. Conditioned stimulation of CCP and phenomenon of life

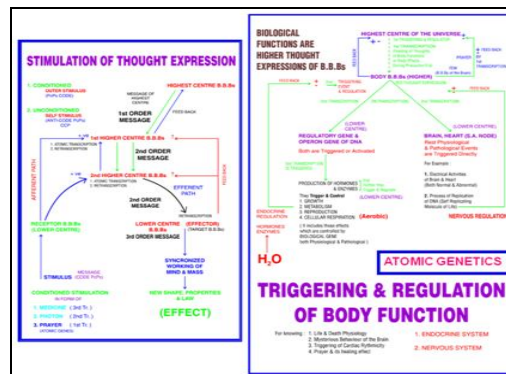

Figure 21: Stimulation of thought expression by conditioned

Few body functions (Figure 21) are triggered by unconditioned thought expressions like mysterious behavior of brain i.e. creative thoughts , few dreams and triggering of cardiac cycle i.e first systole in utro . Few other functions are triggered by conditioned stimulation of thoughts like life and death physiology i.e. if you add water , you would see life effect and if you remove water , you would see death effect and prayer and its healing effect.

2.14. Unconditioned and conditioned stimulation of CCP in life phenomenon

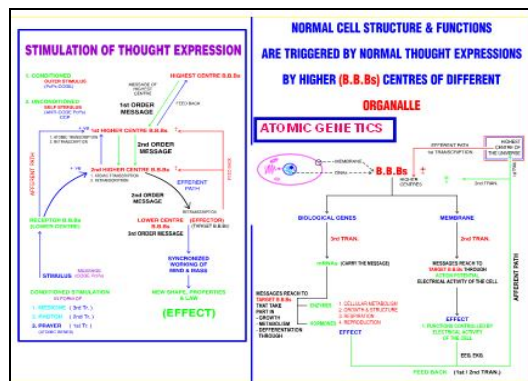

Figure 22: Stimulation of thought expression by unconditioned or conditioned in our body

Triggering and regulation of cell functions or cell physiology (Figure 22)

Normal cell structure and function are triggered by atomic transcriptions or thought expressions by higher centers (B.B.Bs.) present inside the cell. These higher centers are found in DNAs and in the membrane.

Higher centers in DNA express thoughts. The programmed messages (code PCP) are carried by photons from nucleus of the atom to electrons. Thus messages come on the surface of DNA molecule. These messages shift to mRNA during third transcription. mRNAs carry the messages (code PCPs) from nucleus to cytoplasm where messages are translated by ribosome. Simultaneously, messages shift to peptide chains (enzymes & hormones) These enzymes and hormones carry the messages to target units (B.B.Bs.). Having received the messages, target units work accordingly and life effects like metabolism, cellular respiration, growth and structure formation, and other metabolic effects are observed. There is feedback of the effects to the higher centers. Thus triggering and regulation of metabolic functions are carried out.

Similarly, the higher centers of membrane express thoughts. These thoughts are carried by photons from nucleus to the electron of the atom. Thus messages (code PCPs) come on the surface of the membrane. Here they are modulated on pace maker electrical activity and further on action potential and thus action potential (second transcription) carries the messages from one part of the cell to the other part of the cell. This is called electrical effects (EEG and ECG) of the cell. There is feedback of these effects to higher center and thus these effects are triggered and regulated.

Both the effects (metabolic and electrical) have their feedback not only to higher centers but also to highest centers via first transcription. So highest centers is well informed about all effects of the cell. Higher centers are not autonomous centers rather they are also under control of highest centers of the universe.

2.15. Body functions and their regulation by different centers

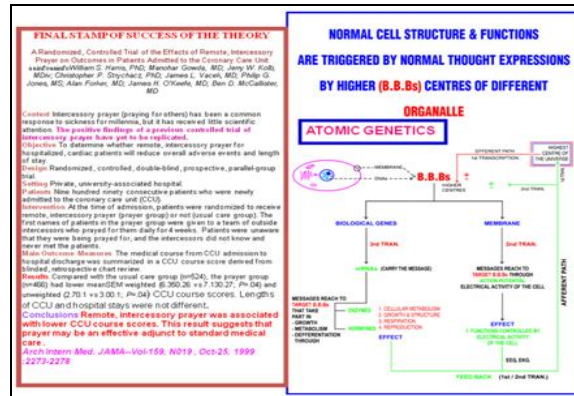

Figure 23: Stimulation of thought expression by unconditioned and conditioned

Our all body functions (Figure 23) are triggered by different thoughts expressions by different higher centers present in biological genes or DNA or in membrane of the cell . Thus different life effects are seen . There is feed back to Highest center of the universe. That controls higher centers of our body. Prayer triggers this highest center to have its healing effect. Highest center is situated in invisible universe beyond CDM layer. Concept of SOUL is myth.

2.16. Phenomenon of cell transmutation by Mind

Figure 24: Stimulation of thought expression by unconditioned and conditioned - Mechanism of cancer etiology by carcinogens and hereditary

STIMULATION OF THOUGHT EXPRESSION --- Shifting of thought expressions from normal to abnormal could be triggered (Figure 24) by either from outer stimuli i.e. CONDITIONED STIMULATION of thought expression, which is caused by physical and

chemical carcinogens or viruses etc or it is self stimulate i.e. UNCONDITIONED STIMULATION of thought expression , which is caused by hereditary factors.

2.17. Conditioned stimulation of CCP phenomenon of Germination

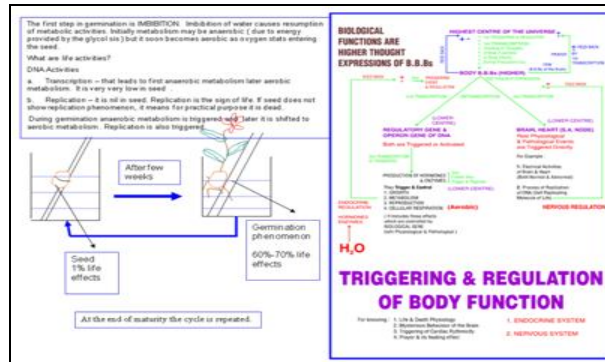

Figure 25: Stimulation of thought expression by conditioned

Few functions are triggered by conditioned stimulation of thoughts like life and death physiology i.e. if you add water , you would see life effect and if you remove water , you would see death effect (Figure 25)

2.18. Conditioned stimulation of CCP and phenomenon Dispersion of White light

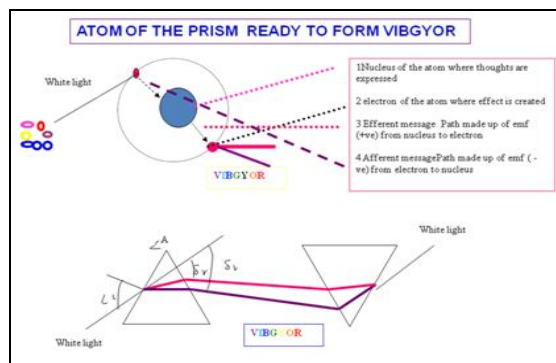

Figure 26: Stimulation of thought expression by conditioned

Formation of VIBGYOR is due to conditioned thought expression of CCP of the prism atoms. Unless different thoughts are expressed, VIBGYOR formation could not take place. The same is true for white light formation from VIBGYOR in reverse prism. Here reverse thoughts are expressed.(figure 26 and figure 26.1)

Figure 26.1: Stimulation of thought expression by conditioned

2.19. Laws on which atomic genes work. [10]

Atomic Genetics and genetic damage (figure -27)

Having read Atomic genetics and Basic etiology of the cancer, now we discuss how atomic genetics trigger molecular effects like genetic damage etc during carcinogenesis. ATOMIC GENETICS is a new branch of science in which we study about Laws,

PROPERTIES and FUNCTIONS of atomic genes. Now I shall highlight the laws on which atomic genes work. As we have seen that Gregor Mendel had made three laws of inheritance known as ---

- The principle of Dominance---- Mendel therefore concluded that what were transmitted from parent to offspring were discrete factors. Each factor contained information about the form of the trait. The factor associated with the form which was expressed in the hybrid offspring (F1) was DOMINANT. For example, the factor for yellow seed color was a dominant factor. The factor associated with the form which remained hidden in the F1 but reappeared in the F2 was RECESSIVE, Thus the factor for the green seed color was recessive. Mendel's factor is now recognized as the gene.

In atomic genetics this law is interpreted like this ---- During atomic transcription or thought expressions few thoughts are expressed and these are called dominating thoughts and rest thoughts which are not expressed are called recessive thoughts. Thus particles, atoms and molecules show only those properties which are triggered by dominating thought expressions. During transmutation, dominating thoughts get recessive while recessive thoughts get dominant. Single effect or property is triggered by single dominating thought expression or atomic transcription.

For example-- Normal genetic arrangements are triggered by normal arrangement genetic dominating thought expressions while genetic damage is triggered by abnormal arrangement genetic dominating thought expressions. Abnormal arrangement genetic thought expression is triggered by carcinogens only after normal arrangement genetic thought expressions get recessive. Or we can say normal genetic arrangement are triggered by normal arrangement genetic thought expressions and when carcinogens come in contact with the cell, they shift the thought expression from normal to abnormal genetic arrangement. With the result we observe genetic damage. Thus carcinogens suppress dominating normal arrangement genetic thoughts and they trigger abnormal arrangement recessive genetic thoughts. With the result genetic damage is seen.

- The Principle of Segregation---The principle of segregation states that allele pairs separate or segregate during gamete formation, and the paired condition is restored by random fusion of gametes during fertilization.

In atomic genetics it will be interpreted like this --- There is separate atomic transcription for separate effects. So if there are hundred effects, they all are triggered by hundred separate thought expressions or atomic transcriptions.

For example --- Genetic damage is triggered by separate thought expression and rapid growth is triggered by separate thought expression and dedifferentiation is triggered by separate thought expression. And all these thought expressions are triggered by carcinogens. But the timing of thought expressions is different. Genetic damage thought expression is first to trigger and later rapid growth and dedifferentiation thought expressions.

- The Principle of independent assortment---- The principle of independent assortment states that if we consider the inheritance of two or more genes at a time, there distribution in the gametes and in the progeny of subsequent generations is independent of each other. In atomic genetics it will be interpreted like this--- In one phenomenon, if two or more than two transcriptions or thought expressions are expressed that will give rise to two or more than two effects, it dose not mean that there expression is DEPENDENT ON EACH OTHER.

For example --- In phenomenon of carcinogen sis, there is effect of genetic damage, there is effect of rapid growth and there is effect of dedifferentiation. All these effects are triggered by separate thought expressions. The simultaneous expression of these atomic transcriptions is independent of each other. Or these thoughts expressions are the part of the carcinogenesis phenomenon but their expressions are independent of one another. It does mean that for rapid growth thought expression, genetic damage thought expression is NOT essential.

Having informed about the laws and working of atomic genes, Now we discuss phenomenon of carcinogen sis, which is triggered by, outer stimuli like physical, chemical carcinogens or virus or they are self stimulated i.e. hereditary factors.

When Genetic damage is not essential for cancer transmutation then what is the role of Genetic damage? . Why do carcinogens trigger genetic damage first? How do carcinogens trigger carcinogenesis?

Figure 27: phenomenon of cell transmutation into cancer) [10]

3. Conclusion

Our universe is deterministic order of universe and each effect is destined i.e. effects are triggered by thoughts and each thought is fed thought and feeding was done in precreation era by Highest center of the universe . Hence all sciences are made by self knowledge of Almighty Basic building block. Hence Albert Einstein’s famous story is true i.e. “ God (Almighty B.B.B) does not play dice”.

4. Acknowledgement

Thanks to Editor of the journal IOSR publishing my work on cancer basic etiology in detail May 2014.

Discussing Mind and Mass realities with Prof. A.P.J. Abdul Kalam , Physicist in Sept 2013 (Ex President of India and winner of Bharat Rattan award) He encouraged me by saying “ Great work “ after 40 minutes of the discussion .

Thanks to Dr R.R. Puri who invited me as guest in 2003 in above conference to deliver talk on Physics education and Basic research as regard Mind incorporation in Physics under Different View of Science .

Thanks to Prof H.S Shukla (Oncologist at BHU Medical sciences) considering my research for this oration award in 2001 .
