

## **RATING OF SCIENTIFIC JOURNALS**

The National Academy of Agricultural Sciences (NAAS) is a think tank that provides a forum to scientists to present their views on critical issues relating to agricultural research, education and extension. The Academy encourages cutting edge research in different fields of agriculture and accords recognition to scientists by electing them as Fellows, giving them Awards and admitting young scientists to Associateships.

The election of Fellows involves a rigorous assessment of research achievements of the nominees for which emphasis is given to their scientific publications. Therefore, a need was felt in the Academy for critically assessing the published work of the nominees for the Fellowship/Associateship and for developing a transparent and quantifiable mechanism that avoids arbitrariness in assessment. Accordingly, the Academy initiated a process of rating of scientific research journals with the primary objective to bring uniformity in the evaluation of publications by the nominees for Fellowship/ Associateship by different Sectional Committees.

### **RATING OF SCIENTIFIC JOURNALS 2012 (Effective from January 1, 2013)**

<b>S.N O.</b>	<b>JRNID</b>	<b>NAME OF THE JOURNAL</b>	<b>NAAS MARKS</b>
